An

An Astrologo-Physicial Discourse.

THat the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the { Sanguine, Cholerick, Phlegmatick, Melancholly } bleed the ☽ being in { ♓, or ♊. ♋, or ♈. ♐, or ♒. ♎, ♒, or ♓. }

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☽ is in ♋; with Pills, when she is in ♓; with Portions, when in ♈, because then posited as before directed.

Vomits are unsafe for all sorts of complections and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the Stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☽ ☍ in ♉, ♍, or ♐ in any good Aspect of ☿, ♀, or ☉.

Glysters are most conveniently administred, when the ☽ is in ♈, ♒, or ♍, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☽ is in any of the Earthly Signs, viz. ♉, ♍, or ♑; of which experience is a valuable witness.

Very proper to Bath, when the ☽ is in ♋, ♎, ♒, or ♓, in Aspect of ♀, or ♃.

Convenient to cut Hair, the ☽ being in ♎, ♐, ♒, or ♓, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

Sundry Excellent Astrological Rules to be Observed in Agriculture, Husbandry, &c. according to *Claudius Dariot*, and other Learned Astrologers, Physicians, and Philosophers.

IT *is not unknown* (*but by daily Experience demonstrated*) *to those of* Cain's *Profession*, (*viz. Tillers of the Ground*) *that all* Plants, Seeds, *and other things, which are produced out of the Bowels of the Earth*, (*having her for their common Parent, as it were*) *do receive both Increase and Decrease by the motion, and position of the* Moon, *and therefore it is, that the careful Husbandman in Sowing* Seeds, *planting* Trees, *graffing* Scions, *pruning* Vines, *gathering* Fruit, *felling* Timber, *dunging Land, and in all other necessary Appendixes to Agriculture, that he may the better reap the Fruits of his Labour and Toyl, should be acquainted with the Influences of the* Moon *and* Stars, *as the Noble* Virgil *approves of in his* Georgicks. *And that his expectations may be the better answered, he ought in the first place to have a special regard to the Place and condition of* Saturn *that he be not impedited or afflicted in the beginning of any Rural affairs, for that he is the Ruler of Husbandry, and hath Dominion over all Terrene Commodityes. Let him therefore* (*if you can so order it*) *be in good aspect of* Jupiter *or* Venus *well affected, not Peregrine, Retrograde, or Combust, but rather in some of his own Dignityes, in good Configuration of the* Moon, *free from the Beams of* Mars, *who, in this Case ought to be weak, Cadent, Peregrine, Combust, void of all Dignityes as well Essential as Accidental,*

Let all manner of Grain or Corn be sowed when the Moon *increaseth, in Signs movable, as* Aries, Cancer, Libra, Capricorn, *or, if so chance to be in* Taurus, Virgo, Sagittarius, Pisces, *let her be in a* Sextile *or* Trine *of* Saturn; *if your Land be moist, or the Seed of a moist nature that is sowen, then let the* Moon *be decreasing in* Virgo, Capricorn *or* Aries. — *If your Ground be dry, and the Seed of a like condition, let the* Moon *be increasing in* Cancer *or* Pisces, *in good aspect to* Saturn *who, together with the* Moon *should be in good Configuration of* Jupiter *or* Venus, — *but if your Land whic*

is to be sowen be of a middle Constitution or condition, viz. between dry and moist, it is then good to sow it, when the Moon *is in* Libra *well befriended.*

What you intend to plant, let the Moon *be in* Conjunction, Sextile *or* Trine *of* Saturn, *free from the Body or ill Beams of* Mars *in a fixed sign as* Taurus, Leo, Scorpio *or* Aquarius, *and let her be in some aspect of* Jupiter *and* Leo, *if possible.*

In planting Trees or Vines, let the Ascendant be Fixed and the Moon *placed in an Earthy sign, as* Taurus, Virgo *or* Capricorn, *in good aspect of* Saturn.

Graft or prune Trees the Moon *decreasing in* Aquarius *chiefly, and in aspect of* Jupiter *or* Venus.

Cut Timber for Architecture, from November *the 22. to* January 22. *the* Moon *decreasing in* Taurus, Virgo *or* Capricorn, *and let them be in good aspect of* Saturn.

Plash Hedges fell Wood for Barrel, that the Stocks may the better grow again, the Moon *increasing in* Aries *or* Libra, *chiefly in the first quarter,* Jupiter *or* Venus *assisting.*

Cut Vines in December, January *or* February, *the* Moon *in* Aries, Taurus *or* Libra. *Remove Trees when she is in the same signs, all the last quarter in* November, December *or* February *dung Land to prevent Weeds.*

Good to till Gardens to sow and set Roots and Herbs; to set Hop-Poles and make a Hop-yard, the Moon *in* Libra *or* Aquarius.

Gather Apples, and other Fruits, Herbs and Flowers to have them large and fair, the Moon increasing toward the Full, to keep and preserve them sweet, gather them dry the Moon decreasing in aspect of Jupiter *or* Venus.

Shear sheep, cut Grass for Hay, the Moon increasing, so it will Spring again the sooner.

Kill fat Swine near the Full, the Fat will endure boyling the better, and waste less then if Killed at other times.

Geld Cattel, Knit Lambs, the Moon decreasing, free from the Beams of Saturn *or* Mars, *and in some aspect of* Jupiter *or* Venus.

Set Beans or Pease in the New Moon, and they will ever be Blooming, and so run all up into Stalks: This is affirmed by that excellent Philosopher Sir Gh. Heydon, *in his admirable Defence of Astrology.*

Of

Of the ECLIPSES *which will Happen in* 1696.

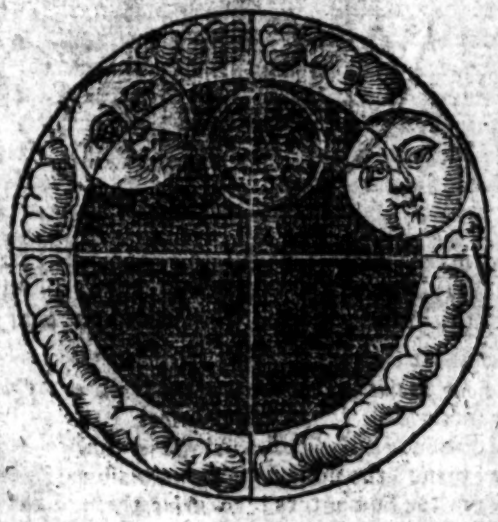
THE Learned Mathematician and Astrologer *Andrew Argol* will have four Eclipses in 1690. *viz.* Two of each Luminary. But I can discover only one Solar, and Two Lunar Defects as to us in *England*, which will thus in order follow.

I. The first will be a total and visible *Eclipse* of the *Moon* on the 6th Day of *May* in 27 Degrees of the Celestial Scorpion.

	H.--M--S.
It begins *May* the 6th.	10--18--21
Total Darkness	13--15--20
End of the *Eclipse*	1--33--41
Digits *Eclipsed*	19--54--00
Total Duration	03--15--20

The *Type* of its Appearance in *London*, is thus,

N.



E. V.

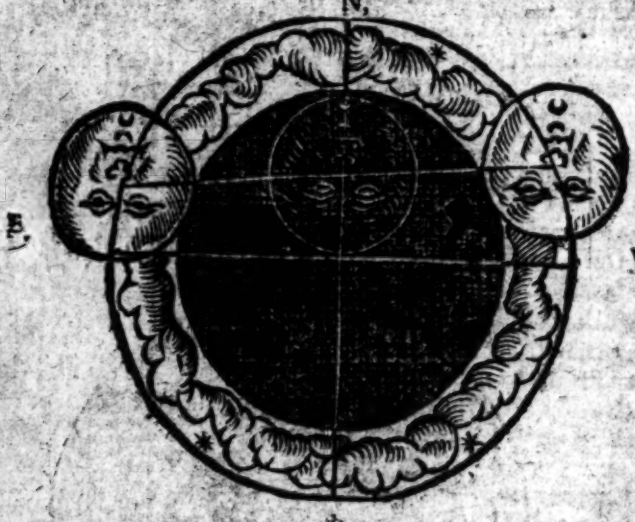
II. *The* Second will be an Invisible Solar *Eclipse*, on *May* the 20. day, near our 10 of the Clock at Night, in 10 degrees of *Gemini*.

The third will be a total and visible Lunar Defect, on the 30. day of *October*, about our 4 of the clock in the morning.

Be-

	D.--H.--M.--S
Beginning of Eclipse, *October* ——	29--14--54--48
End thereof, at —— ——	18--17--22
Total Duration —— ——	03--22--34
Digits Eclipsed —— ——	13--33--34

The Type of its Appearance will be thus,



Argol makes these Two Eclipses, not only total (as I do) but nearly Central also; as may be seen in his *Ephemeris* for this Year 1696 But they will not appear with us.

Thus much of the Eclipses,

Of the Four Seasons of the Year, their Natures, Qualities and Descriptions.

I. *Of the* Spring-Season.

The Spring, the most delightful Season of the Year begins when the Sun enters into *Aries*, the first and chief Sign of the Zodiack, which this Year happens to be on *March* the 9th. day just at Noon, in *London*. The latter part of *Cancer* then ascends on the East Angle. This Season continueth all that time the Sun passeth the three first Northern Signs, *Aries*, *Taurus*, *Gemini*.

At the beginning of this Season, the Sun makes Days and Nights

Nights equal all the World over. And then leaving the Inhabitants of the Southern Hemisphere, doth refresh and revive all those that dwell in the Northern parts of this Globe

The Astronomical Rulers of this quarter, are *Mars*, *Venus* and *Mercury*, which Planets naturally import Vigor, Delight, Mutability, And accordingly, while the Sun is in *Aries*, all Vegetables put forth their Leaves and Blossoms, and Nature expresses a Spring-like force in all her Friendly Productions

While the Sun continues in *Taurus* (the dignities of *Venus*) the Leaves and Flowers of the Spring Expand and shew themselves after a delightful manner: and Dame *Vesta* sets open her Rich Treasury, and Paradice of Pleasures to all her Sons and Daughters, to exercise and delight their souls and senses.

All the time the Sun transiteth *Gemini*, (the Dignities of *Mercury*) Natures Lymners are notably Employ'd: and out of *Mars* his Vigour, and the Delights of *Venus*, do paint out a Million of pleasing Varieties to the World.

But now, as if God and Nature never intended that Mankind should be Gluted with beholding of one Object continually, this Glorious and Amiable season, the Youthful Spring, with all its verdant Varieties leaves us. And so we approach

II. The Summer-Season.

This Summer-Season begins where the Spring ends. And the Sun Mounting his Apogæan *Chair of Honour, is removed to his greatest distance from the Earth making the largest quantity of sunshine and least Portion of Shadow, or (which is all one) long st Days, and shortest Nights to us. This Season now begins on* June *the* 10th *Day, at* 2 *h.* and 20 *m in* P. M *or Afternoon, and continues all the time the sun makes his Progress through the* 3 *last Northern Signs* viz. Cancer, Leo, Virgo. *And the grand Rulers of this quarter are the* Moon, Sun *and* Mercury,

The Moon *as ruling* Cancer, *here Precedes the Sun in Dominion, and all the Births of the preceding Spring are swell'd into a pleasing Dropsey, and so continue for the first summer Month. Then the* Sun, *as having greatest power in* Leo, *assumes a particular as well as general power of Government, and by his great Heat reduces all Vegetables from their Anasarchal swelling, into a positive Hectick Feaver, thereby Ripening the seeds of* Flowers, Herbs, Fruits, &c. *and this is the business of the second Month.*

After

After the Sun has perform'd his Excellent Office, Mercury enters upon his Regency, which is the last Month of the quarter. And, according to his double dignity in Virgo, (Virgo being a dry sign) He exsiccates all things from their Hectical condition into a direct Marasmos. And now every thing being fully Ripe, (as the Corn ready for the Sickle, and the Harvest-Man's Levelling Hand) and the Disease of this season being become thus desperate, 'tis in vain to think to Restore its wasted spirits by Cordials, or by any other means.

Do you not see how orderly the seasons of the Year are Governed by the several Planets in their Turns? And this too, according to their Natures, as Astrologers have distinguished of their Dignities.

Thus, having seen the death of the Spring and Summer-seasons, the only Pleasant and Charming Parts of the Year; Let us in the next place Attend their Funerals. Which will be by considering

III. The Autumnal quarter.

The Autumnal quarter is the third Season of the Year, and the declining Equinox thereof. The Days and Nights are now again equal all the World over, and the Sun doth irradiate both the Poles equally, as at the beginning of the Spring. Autumn begins where the Summer ends. viz. At the sun's touching the first point of Libra, which this Year happens on Sept. 11. 18 ho. 5 min. P. M. or Afternoon. Libra 1 degr. then Ascending, and Cancer 1 degr. Culminating. This quarter continueth all the time the Sun passeth through the three first Southern Signes, viz. Libra, Scorpio, Sagitary and the Planets following those Signes, are Venus, Mars and Jupiter.

Kind Venus, as ruling Libra, bestows her Tears upon the deceased Summer, and thereby Generates a Phœnix out of the Old Ones Ashes: Whereof in the first of these Months we are made happy with a later Spring. But alas! not of any long duration, but soon fading, like all earthly Joyes and Pleasures.

Then Mars, as Governing Scorpio, Comes and adds Heat and Drinels to the Moisture that Venus lent, thereby to cherish and invigorate the late Spring. But that also is soon returning, by reason of the Suns Absence, which is the Fountain of all Heat, and grand Principle of Generation, and Producer of all things.

Lastly, Jupiter takes his Turn of Regiment, as being Lord of Sagittary, and by his Ballamick Beams endeavors to preserve what Mars and Venus of themselves could not. And so Conserves the

Mummik

Summ al Vertue of all Plants, Herbs, Fruits, Flowers, &c. for the good of Humane kind, whereby the Species *of all things are preserved at least to the end of this declining quarter, which is as far as his Gubernation extends. And so leaves us to consider of--*

IV. The Brumal *or* Winter-quarter

Which initiates always where Autumn ends. And Astronomically commenceth when the Sun salutes the first Scruple *of* Capricorn, *the Earth being then farthest distanced from the Suns perpendicular Rayes, receiveth least quantity of sun-shine, and greatest portion of shadow, thereby causing shortest Days and longest Nights, to all that inhabit on this side the* Equator, *the Sun is now in* Perigæo, *or nearest distance from the Earth, being in opposition to his* Apogæon, *which is* Cancer.

This dark and Melancholy quarter this Year begins on December *the 10 day, at 20 ho. and 2 min. P.M. or Afternoon. 3 degr. of* Virgo *then Culminating, and 28 of* Sagittary *arising in the Horoscope. And it continueth all that quantity of time the Sun is transiting through the three last southern Signes, viz.* Capricorn, Aquarius, Pisces. *The chief Rulers of them are* Saturn *and* Jupiter.

Saturn, *you see, hath a double Power to what* Jupiter *enjoys;* Capricorn *and* Aquarius *being both his* Domiciliums *or* Mansion-Houses. *And* Iupiter *Rules over the last Sign of this quarter, viz.* pisces ——*Hence it is, that all things look with a sad, wither'd and unpleasant Countenance, wearing the Image of Death and Destruction. Now* Frost, Snow, Hail, thick clouds, Isicles, extremity of cold, Barrenness, *and all things that are Negative to Delight and Pleasure have their Regency,*

(☞) *Thus we find how all the Yearly* Seasons *are made, and how by struggling and contending Interests Maintain'd. And also how as the last Saturn truly proves himself the Devourer of his own Issue. And, how benign* Iupiter, *by his gentle Moisture in* Pisces, *puts us in Hope of an Approaching Spring.*

And thus by this orderly Rule of the Planets through the several Seasons of the Year, are we put in minde of the several Parts of our Lives agreeable thereunto, viz. How we Pass the Spring of our Youth, the Summer of our Manhood, our Autumn of declining years, and the Winter of our Old Age.--- Where Saturn *with his sharp Sickle stands ready to cut us down. And lastly, how by passing through this Vale of Misery, this Natural Death, we Ascend to the Government of the true* Jupiter, *viz. to Immortality and a Blessed*

Life,

Life, where we shall be companions for Angels, and behold the Face of God in Glory ——— *But*——

Oh! Who shall tell! Who shall Describe thy *Throne*?
Thou Great THREE ONE!
There, thou thy Self dost in Full Presence shew,
Not absent from the Meaner Worlds below:
No, if thou were, the Elements League would cease,
And all thy Creatures break thy Natures Peace.
The Sun would stop his Course, or Gallop back;
The Stars drop out, the Poles themselves would Crack;
Earth's strong Foundations would be torn in twain,
And this Vast Work all Ravel out again,——
To its first Nothing—— *Cowley in Davideis l.*1
